Dear Colleagues and Friends of electrochemistry and of electrochemical engineering in particular,

It gives us great pleasure to invite you to the new edition of the European Symposium on Electrochemical Engineering. This already 11th edition of the Symposium will take place in Prague, Czech Republic, under the motto Today’s research for tomorrow’s technologies. We both hope that we will all again have a chance to enjoy the wide-ranging richness of our common subject in Prague, which in the course of the previous editions has become a tradition.

We look forward to seeing all of you in Prague in June 2017

Karel Bouzek  
Chairman of the Organizing Committee

Manuel Rodrigo  
Chairman of the WP on Electrochemical Engineering, EFCE
CONFEREECE TOPICS

- Green technologies for sustainable development
- Electrocatatalysis and electrochemical technologies
- Safe water and air
- Energy conversion processes
- Bioelectrochemistry – a launch-pad for new frontiers in electrochemical technologies
- Surface treatment and corrosion engineering
- General session

IMPORTANT DATES AND DEADLINES

Deadline for paper submission: December 31, 2016
Confirmation of Acceptance: March 15, 2017
Deadline for standard registration: April 15, 2017
Final Programme displayed on website: May 20, 2017
Conference: June 4 - 8, 2017

Venue | www.techlib.cz/en

The conference will take place in The National Library of Technology, the largest and the oldest library of technical literature in the Czech Republic. Housed in a modern, ecological building situated in the heart of the Dejvice engineering and technology campus, NTK serves as a social and cultural centre, with frequent lectures, educational tours, events, and exhibitions.

Prague, The National Library of Technology
